

NOTICE: EMPTYING OF YOUR SEPTIC SYSTEM

Sanivac Group has been mandated by the Roussillon RCM to empty your septic system, in accordance with the terms and conditions of MRC de Roussillon By-law 232 on periodic drainage of septic systems, in force since January 30, 2023.

1- Preparing the septic system

Please find attached a brochure with instructions. It is important to fully prep your system before the inspection.

If your septic system could not be emptied in the scheduled period, you will be billed by the municipality for related travel expenses.

2- Inspection

The MRC de Roussillon will come out and perform an inspection to ensure all pre-drainage work has been completed. A door tag will be left to confirm that everything is in order or to flag any corrections required.

Time of inspection: Between **X** and **X**, Monday to Friday, from 9 a.m. to 5 p.m.

3- Emptying

Your system will be emptied in the weeks following the inspector's visit. The exact dates will be indicated on the door tag left with you during the inspection.

On the day the tank is to be emptied, turn off the pump (for Bionest and Hydro-Kinetic systems) or Biolarm (for Bionest systems).

Requests and questions

For all requests related to:

- A date change or full drainage of your system
- Questions about drainage operations
- Submitting any information about your system, before or during the visit
- An additional or emergency drainage of your system
